

Principles of and requirements for public reporting of mining companies by securities regulators with the Australian example of JORC, ASIC and ASX.

Ian Goddard Deputy Chairperson, CRIRSCO JORC Representative 7th AMM Congress Astana, Kazakhstan 16 June 2016

1. Produce and be responsible for maintaining a reporting standard that is compatible with the Template and which is recognised as the standard for Public Reporting, or has the wide support of professional bodies, in the country/region.

3. Include credible, self regulating, professional bodies that provide disciplinary systems and codes of ethics that govern the behaviour of Competent Persons or equivalents as defined in the Template.

- All CRIRSCO National Reporting Organisation (NROs) meet criterion 1.
- Many differences re recognition (or not) by regulators of companies or securities exchanges
- All have support of professional bodies
- All have professional bodies which have effective disciplinary processes for Competent Persons (Criterion 3)

crirsco Competent Person Statement

Public reports of Exploration Results, Mineral Resources and Ore Reserves for significant projects for the first time or when those results or estimates are materially changed must:

- Name the Competent Person and the Competent Person's firm or employer.
- State that the public report is based on the documentation compiled by the Competent Person; obtain the prior written consent of the Competent Person(s) to the "form and context" in which the public report refers to the information in the documentation prepared by the Competent Person; and
- Include a statement that this (prior written) consent has been obtained—this is now facilitated by the existence of the Competent Person Consent Form (available from the JORC website). The onus is on the company to obtain approval, but the Competent Person should encourage observation of the requirement.

Mineral Resources

The data in this report that relate to Mineral Resources for Frieda River deposits (Horse-Ivaal-Trukai, Koki and Ekwai) are based on information reviewed by Mr Shaun Versace who is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM).

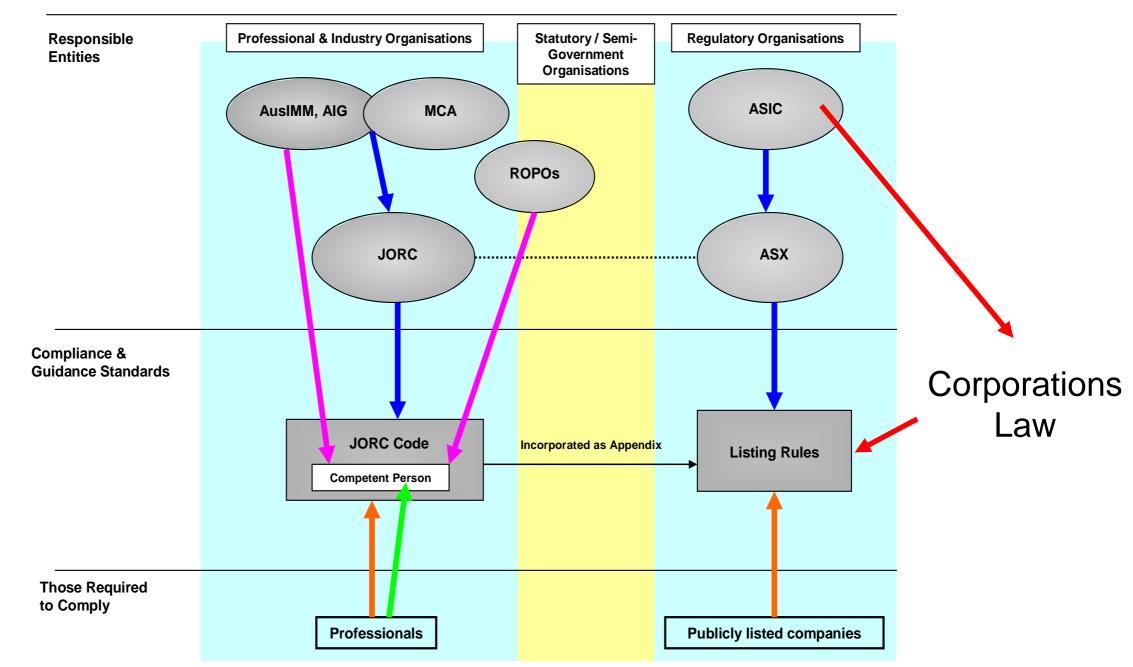

Mr Versace is a full time employee of PanAust Limited. Mr Versace has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.

Mr Versace consents to the inclusion in the report of the Mineral Resources in the form and context in which they appear.

JORC Code incorporated in ASX Listing Rules

JORC Code is referred to in Chapter 5

(Clauses 5.6 to 5.24)

 JORC Code is attached to the Listing Rules as Appendix 5A

ASX Listing Rule – Chapter 5

Chapter 5

Additional reporting on mining and oil and gas production and exploration activities

Table of contents

The main headings in this chapter	Rules		
Quarterly reporting	5.1 - 5.5		
Reporting on mining activities	5.6 - 5.24		
Reporting on oil and gas activities	5.25 - 5.44		
Terms of a +mining tenement and a +petroleum tenement joint venture	5.45		
Australasian Code for Reporting of Mineral Resources and Ore Reserves (the JORC Code)	Appendix 5A		
+Mining exploration entity and +oil and gas exploration entity quarterly report	Appendix 5B		

Explanatory note

This chapter sets out additional reporting and disclosure requirements for +mining entities and +oil and gas entities, and other +entities reporting on mining and oil and gas activities.

Information to be given to ASX for release to the market must be given to ASX's +company announcements office.

Related from Alle, whereas any Alle provide Linguistic and the second state of the sec

Reporting on mining activities

Requirements applicable to all public reporting

- 5.6 Subject to rule 5.10, a public report prepared by an +entity must be prepared in accordance with rules 5.7 to 5.24 if applicable and Appendix 5A (JORC Code) if applicable if the report includes a statement relating to any of the following.
 - +Exploration targets.
 - +Exploration results.
 - +Mineral resources or +ore reserves.
 - +Production targets. Note production targets are not included in the JORC Code

Note: the rules in this chapter relate to the reporting of exploration results, mineral resources, ore reserves, historical and foreign estimates and production targets. Appendix 5A (JORC Code) relates to the reporting of exploration targets, exploration results, mineral resources and ore reserves. This rule is not confined to reports under this chapter. It also applies to all public reports, including prospectuses, product disclosure statements, information memoranda, bidder's and target's statements, annual reports, financial statements, technical papers, presentations, website content and information given to ASX for release to the market under other chapters of these rules.

ASX LISTING RULES Guidance Note 31

REPORTING ON MINING ACTIVITIES

The purpose of this Guidance Note	 To assist listed entities to understand and comply with the reporting requirements for mining activities in Chapter 5 of the Listing Rules
The main points	The quarterly reporting obligations that apply to mining entities
It covers	 The general requirements that apply to all public reports of one reserves o mineral resources
	 The requirements that apply to public reports with information about a geophysical survey
	 The reporting requirements that apply to public reports of exploratio was to for motorial mining projecta.
	 The requirements that apply to public reports with an estimate of minera measures or ore reserves for material mining projects
	 The requirements that apply to public reports of historical and foreign estimates of mineralisation for material mining projects
	 The requirements that apply to public reports of certain production target and forecast financial information certiled from those production targets
	 The interaction between Chapter5 and other reporting obligators including the obligation to give market sensitive internation to AS immediately.
	 The requirement for mixing exponential entities to include a list of mixing lenements in their simulal report.
	 The requirement for mining entities to include a minoral resources and on reserves statement in their annual report
	Competent person requirements

ASX MINING REPORTING RULES FOR MINING ENTITIES: FREQUENTLY ASKED QUESTIONS

Transition to new disclosure rules

Reference material: ASX Listing Rules Guidance Note 31.

 When do the JORC Code 2012 and the new rules relating to the reporting of mining activities in Chapter 6 of the ASX Listing Rules (together, the "new disclosure rules") come into effect?

With one exception, the JORC Code 2012 and the new disclosure rules in Chapter 5 of the Listing Rules come into effect on 1 December 2013.

The one exception relates to the requirements for a study at the Pre-Feasibility or Feasibility level to be completed in order to declare an Ore Reserve in clause 29 of the JORC Code 2012 and Listing Rule 5.9.1, which do not come into effect until 1 December 2014.

Can entities continue to report Exploration Results, Mineral Resource or Ore Reserve estimates prepared under the JORC Code 2004 post-transition (ie, after 1 December 2013) or do they need to update the information to comply with the new disclosure rules?

The new disclosure rules establish an enhanced 'if not, why not' disclosure regime based around Table 1 of the JORC Code. They apply whenever.

- new results or estimates are reported for the first time post-transition; or
- there are material changes post-transition to previously reported results or estimates.

In the case of the JORC Code 2012 for a 'significant project' and, in the case of the ASX Listing Rules, for a 'material mining project' (see below).

Accordingly, results or estimates that were prepared in accordance with the 2004 Code and reported pretransition can continue to be referred to in Public Reports post-transition without being updated to comply with the new disclosure rules, provided there has been no material change in those results or estimates.

However, as soon as there is a material change in those results or estimates, if they relate to a 'significant project' (JORC) or 'material mining project' (ASX), the information will need to be updated to comply with the new disclosure rules.

To avoid misleading readers, an entity that reports results or estimates post-transition for a significantimaterial mining project that were originally reported under the 2004 JORC Code and here not been updated since to comply with the new disclosure rules should make it clear that the information has been prepared in accordance with the 2004 Code rather than the new disclosure rules. A statement along the following lines should suffice:

- Australian Securities and Investment Commission
- Recognises JORC Code
- Improved relationship in last few years
- Differing perspectives
- Role of Directors
- Regulatory Guides/ Information sheets

Industry codes

The obligation to have reasonable grounds for forward-looking statements is a legal requirement separate to any industry code. However, as forward-looking statements such as production targets, forecast financial information and incomebased cash flow valuations relate to exploration targets, exploration results, mineral resources or ore reserves, you must take into account the relevant professional and industry standards in assessing whether reasonable grounds exist. For mining and exploration reporting in Australia, the industry standard is the <u>JORC Code</u>; and for technical expert reports, the <u>VALMIN Code</u>.

JORC Code

The JORC Code provides directors, shareholders, investors and their professional advisers with an internationally accepted standard to help assess and compare disclosure by different companies that is often highly technical. Disclosure under the JORC Code is governed by the principles of transparency, materiality and competence.

See clauses 4 and 9 of the JORC Code

The materiality principle requires disclosure of 'all the relevant information that investors and their professional advisers would reasonably require, and reasonably expect to find in the report, for the purpose of making a reasoned and balanced judgement'.

The competence principle requires disclosure on exploration targets, exploration results, mineral resources and ore reserves to be 'based on, and fairly reflect, the information and supporting documentation prepared by a competent person'. A competent person 'must have a minimum of five years relevant experience' and be a member of an appropriate professional organisation, such as the Australasian Institute of Mining and Metallurgy (AusIMM), Australian Institute of Geoscientists (AIG) or a recognised professional organisation as published by ASX.

Mining and resources - Forward-looking statements

It is common for investors in mining and resources comparies to put a lot of entertasis on Toward-boiling statements' when considering an investment. In mining, these precidive statements generally include

- production largets (i.e. projections or lorecasts of the amount of minerals to be extracted from mining konsments for periods that extend positive current and forth-corring year.)
- forecast financial information
- · income-based discounted cash flow valuations.

Companies that publish toreard-looking statements that do not comply with the legal requirements take legal and reputational risks, and so care is needed.

This information sheet (INFO 214) arms to give stakeholders a better understanding of the emisting rules that apply to forward-looking statements, thereby improving compliance and rockering any risk of Migdion or regulatory action.

This guidance replains the existing reference sources that apply to forward-looking statements and gives practical advice and examples of how to comply with the existing legal obligations. In particular, it covers,

- the legal recurrenses that forward-looking statements must be based on reasonable grounds
- the application of relevant industry ordes. ADX Listing Rules and ADC quidance
- what constitutes a <u>forwari-loosing statement</u>, and how these are different from <u>approximational statements</u> (which do not need to be based on reasonable grounds).
- + that for reasonable grounds to be established, the JORC Code mineral resource estimates used must be
- based on a sufficient level of geological knowledge and confidence, and all JORC Code modifying factors must be sufficiently progressed
- how the legal requirement to have reasonable grounds applies to <u>are reserve</u> and <u>mineralresource</u> estimations.
- enterioris
- Yow the reasonable grounds requirement applies to the JORC Code's 'economic' motifying factor <u>if secured</u> <u>Andina is not in place</u>
- what the <u>disclosure requirements</u> are for forward-looking statements
- what you can disclose it you do not have reasonable arounds for forward-looking statements.
- what the requirements are for <u>installed loward-looking statements</u> when your company's circumstances
- change or a project changes hands
- what amain ASIC focuses at when assessing forward-looking statements.

Reference sources

ASIC uses all of the outsing reference sources lated in the appendix to seasts whether publicly evaluable forward-koning abstraments compty with the law. This information shared on, and should be read together with the sources listed.

http://www.asic.gov.au/regulatory-resources/takeovers/forward-looking-statements/mi... 12/04/2016

crirsco Forward looking statement

A forward-looking statement is a statement about a future matter and is not just a statement about your company's present intention.

For mining or exploration companies, production targets (i.e. projections or forecasts of the amount of minerals to be extracted from mining tenements for periods that extend past the current and forthcoming year), forecast financial information, and income-based valuations are forward-looking statements because they comprise, or are based on, statements about future matters.

crirsco Forward looking statements - example

Certain statements made in this announcement contain or comprise certain forward-looking statements. Although Metallica believes that the visual interpretation and other estimates and expectations reflected in such forwardlooking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements in this release.
